AP Calculus Digital Curve Sketching Card Sort for Google™ Drive

This digital card sort is designed for students to match $f(x)$, $f'(x)$, and $f''(x)$ cards.

DIGITAL CURVE SKETCHING CARD SORT

This activity is a **Digital Card Sort** for students in AP CALCULUS. There are 12 cards in the sort and are scrambled in **GOOGLE SLIDES**. Students can interact with the activity on their one-to-one devices.

There are 4 $f(x)$ function cards, 4 $f'(x)$ derivative cards and 4 $f''(x)$ second derivative cards. Students match a complete set, so the function $f(x)$ matches with the correct $f'(x)$ and $f''(x)$ cards.

There is also a set of black and white cards to create a hands-on lesson, if you are in need of this feature.

***NOTE: YOU AND YOUR STUDENTS MUST HAVE ACCESS TO THE INTERNET TO BEGIN TO INTERACT WITH THE LESSON!**

Every page in the template is color-coded to highlight the page. This gives the student a nice experience as though they are using a pencil and paper assignment. The slides are 8.5 X 11.

DIGITAL CALCULUS CURVE SKETCHING CARD SORT

 **DIRECTIONS:** Find the match for the function, the derivative, and the second derivative.
