Functions & Graph Behavior

Match-Up Activity

About this Activity:

This set of 24 function graph cards is designed for AP Precalculus or Precalculus Honors students to practice analyzing polynomial, exponential, rational, and logarithmic functions and their properties. The set includes a graph card, equation card, description card, and a behavior card.

An answer key and student response page are provided.

You can use the set at the end of the year for test prep, or by dividing the set by function types throughout the school year.
